PROJECTS

Stock Closing Price Prediction Web Application *Live* - Link

- Developed a machine learning-based web application to predict stock closing prices using historical stock market data.
- Built an interactive user interface that allows users to input stock-related parameters and receive real-time price predictions.
- Implemented data preprocessing, feature engineering, and regression-based prediction models to improve prediction accuracy.
- Deployed the application on Render for public access, enabling users to use the model online without local installation.

Serverless Student Result Alert System (AWS) Link

- Developed a fully serverless, event-driven application that automatically processes uploaded student result CSV files and generates personalized email notifications.
- Implemented an automated workflow to calculate result statistics, identify top-performing students, and detect low-score alerts, improving result analysis and communication.
- Designed and deployed the cloud architecture using Amazon S3, AWS Lambda, DynamoDB, DynamoDB Streams, Amazon SNS, IAM, and CloudWatch for scalable, reliable, and cost-effective processing.

SKILLS

- Programming Languages: Java, Python
- Web Technologies: HTML, CSS, JavaScript
- Cloud/Tools: AWS (S3, Lambda, DynamoDB, SNS, IAM)
- Soft Skills: Teamwork & Leadership, Presentation Skills

CERTIFICATES & ACHIEVEMENTS

- AWS DevOps Internship - Naipunyam (2026)
- Earned 5 stars in Java Hackathon
- L4G - GenAI
- Participated in hackathon conducted by organization
